No date	n. d.	Versus	vs., *v.*
No place	n. p.	Volume, volumes	v., vol.
Number, numbers	no., nos.	Year	yr.
Octavo	8°		

Common abbreviations for names of States and months are also used.
H. or S. followed by a number stands for House bill or Senate bill, respectively.
* Document for sale by Superintendent of Documents.
† Distribution by office issuing document, free if unaccompanied by a price.
‡ Document not obtainable.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports, are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 62d Congress, 1st session, is to be understood.

General Information

The Superintendent of Documents is authorized to sell at cost any public document in his charge, the distribution of which is not otherwise provided for.

Documents can not be supplied by this Office free to individuals, **nor can they be forwarded in advance of payment.**

Documents entered in this catalogue that are for sale by the **Superintendent of Documents, Washington, D. C.,** are indicated by a star (*) preceding the price named. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document, a double dagger (‡) indicates that the document is not obtainable, and whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau. The Senate and House documents and reports are issued in limited editions, and unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents give the name of the issuing Department, Bureau, or Division, and title. If publication is numbered give number also. Do not order by Library of Congress card number.

Read carefully the instructions "How to remit," found at the bottom of the next page.

The accumulation of publications in this Office amounts to over a million, of which several hundred thousand are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity.

In ordering, it should be borne in mind that many of the books have been in stock some time and are apt to be shop-worn. In filling orders, however, the best copy available is sent.

No general price-list of public documents is available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including indices. Back numbers can not be supplied. Please notify the Superintendent of Documents of any change in address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{7}{10}$c. for each additional card for the same title ordered at the same time. **Remittances should be made to the Librarian of Congress.** Cards can not be furnished by the Superintendent of Documents.

CUMULATIVE INDEX

The index to the Monthly catalogue will be issued separately each quarter and will cumulate for the twelve months ending June, 1912. That is, the September number of the Index is an index to the Monthly catalogue for July, August, and September, the December number will be an index to the Monthly catalogue for October to December, the March number will be an index to the Monthly catalogue for January to March, and the June number will be the Index for the fiscal year 1912. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, defaced or smooth coins will positively not be accepted.

To facilitate the payment of the cost of documents, the Superintendent of Documents will hereafter accept coupons issued by him instead of cash. Coupons of the value of 5 cents each are sold in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Guam, Hawaii, Philippine Islands, Porto Rico, or to Canada, Cuba, or Mexico. To other countries the regular rate of postage is charged, and remittances must cover such postage.

Notes of General Interest

A new Professional paper of the United States Geological Survey, no. 73, The tertiary gravels of the Sierra Nevada of California, by Waldemar Lindgren, who was recently promoted to the post of chief geologist, treats upon an unusually interesting subject. It traces the history of the great mountain range which for 300 miles divides the central valleys of California from the deserts of the Great Basin, dealing especially with the origin and distribution of the gold-bearing gravels which made these mountains one of the treasure houses of the world. The illustrations include geologic maps and sections and halftone plates showing features of hydraulic mining. The Superintendent of Documents can supply copies at 75 cents.

Another of the valuable papers included in the Annual report of the Experiment Stations Office for 1910 has been reprinted in a separate pamphlet, copies of which can be had from the Superintendent of Documents at 10 cents each. Its title is: Progress in agricultural education, 1910. It has 9 full-page plates and 3 illustrations in the text. It is a record of most hopeful advancement. The movement for scientific education in agriculture has become worldwide. In the United States every agricultural bureau and association, National and State, has enlisted in it, and the people are joining with even greater ardor. At present the United States Agriculture Department is unable to meet all the demands for publications and lecturers. Increased appropriations, by the United States and States, for new buildings, enlarged experimental facilities, and more teachers are the rule, while universities, colleges, and high schools everywhere are adding agricultural courses to their curricula. The movement for a wider diffusion of the kind of education that will lead to increased productiveness of the soil has come none too soon. Never before was the world's population increasing so rapidly as now, and the increased cost of living in all countries demonstrates that the demand for food is growing more rapidly than the supply. In former ages, when war was the normal state of man, when famine followed fast on the heels of war, and pestilence was the common companion of both, while the low state of medical knowledge prevented the raising of barriers against contagion, populations increased but slowly. Now long periods of peace, better knowledge of sanitation, the elevation of medical practice from mere empiricism to the rank (in many respects) of an exact science, and improved means of subsistence through the development of agriculture, permit a prodigiously rapid increase in the number of the world's inhabitants. The only obvious means of feeding and clothing the millions which in ever increasing multiplication from this day henceforth to the end of time must be provided for is the widest possible dif-

fusion of scientific education in agriculture. Many competent and zealous men and women are engaged in this endeavor, and the practical details of important branches of their work are described in the pamphlet named at the beginning of this note. The catalogue entry for this pamphlet appears in the October Monthly catalogue, page 186.

No. 40 of the Interstate Commerce Commission's quarterly Accident bulletin series, railroad accidents in the United States, April–June, 1911, is the fourth number in a new series, issued under a new law. The difference between the two series is that in the first, under the old law, only a part of the accidents were reported. The limitation excluded everything but accidents by collisions and derailments, casualties to passengers, and casualties to employees on duty. May 6, 1910, a law was passed which enlarged the scope of the inquiry by requiring the railroads to report to the Commission also accidents to employees while at work, accidents to passengers in getting on and off cars, accidents to persons doing business at railway stations, accidents at highway crossings, accidents to trespassers (tramps), etc. Even now, however, accidents to employees which do not keep them away from work for more than three days and accidents to persons not employees which do not incapacitate them for more than one day are not reported at all. Neither are the so-called "industrial accidents" which occur to railroad men working on tracks or bridges or at stations, freight houses, engine houses, coaling stations, water stations, etc., when no car is moving at the place, or in and around shops, on boats and wharves, etc. The victims of fatal accidents are not reported as "killed" unless they die within 24 hours. If they linger longer they are reported as "injured." Notwithstanding these exceptions and exemptions, and the further fact that the railroads themselves do the reporting, the accident roll is most deplorably long and ghastly. Though bulletin 40 is the fourth one issued under the new law, it is the first in which a year's footings (July 1, 1910–June 30, 1911) are given. These footings tell their own story: Killed, 10,396; injured, 150,159.

The 27th annual report of the Bureau of American Ethnology (1905–1906) is brief, so far as the report proper goes, and carries but one accompanying paper. That, however, is a very full and important one, the fruit of the life labor and study of Miss Alice C. Fletcher, the distinguished ethnologist, and Francis La Flesche, the educated Indian, who for 25 years has been her collaborator. The title is The Omaha tribe. In her Foreword Miss Fletcher says: "In the account here offered nothing has been borrowed from other observers; only original material gathered directly from the native people has been used." For 29 years Miss Fletcher has been intimately acquainted with the Omaha; for many years she lived with them. Her paper fills 557 pages of text and is illustrated by 65 plates and 132 figures. Price, in cloth binding, $1.50.

Tariff series 27, Customs tariff of Cuba, is just issued by the Manufactures Bureau. The Superintendent of Documents can supply copies for 10 cents.

A new census bulletin, Center of population and median lines, continental United States, has a unique interest as (we believe) the first

printed explanation of the methods used in determining the center of population, which seem to be equivalent to those followed in finding the center of gravity. The center of population moved, from 1900 to 1910, 39 miles west and $\frac{7}{10}$ of a mile north, and is now in the western outskirts of the city of Bloomington, Indiana.

Manufactures Bureau Special agents series 47, English cotton-goods trade, shows a great increase in the cotton-fabrics production of that country, it having passed the half billion mark (in dollars) in 1910 and promising to show a large further increase in 1911. The report, which is by commercial agent Hause, gives a careful and illuminating account of the system which enables hundreds of small cotton mills to carry on an independent and prosperous existence without fear of monopoly. American manufacturers in search of ideas may find them in this pamphlet, which the Superintendent of Documents sells at 5 cents.

Wisconsin is an advanced State in several respects. One of its latest moves is county schools of agriculture and domestic economy. Experiment Stations Office Bulletin 242 tells about them.

It has recently become known that vols. 33 and 34 of the Executive journals of the United States Senate have been printed, though not yet released from the injunction of secrecy.

A pamphlet both interesting and valuable is the one descriptive of its own work which has been issued by the Bureau of Standards. It may be called the bureau of precision. It takes nothing for granted, but tests and verifies everything. It not only supplies and verifies standards of length, area, volume, and weight, which a few years ago were the only known standards of weight and measure, but it also standardizes the measures of velocity, pressure, energy, electricity, temperature, and illumination. It is a clearing house for technical information. It is constantly consulted by Federal, State, and municipal officials, and by technical bodies such as public-service corporations and commissions. Its importance to the various industries and to the general public can hardly be overestimated. Its establishment was authorized by law in 1901, and it has already grown to broad and notable proportions. Its personal force numbers 268, it has in Washington four most modern and effective laboratories, with branch laboratories in Charleston, Northampton, and Pittsburg, and an electrical laboratory building under construction. Copies of the descriptive pamphlet can be supplied by the Superintendent of Documents at 5 cents each.

Forest Service Bulletin 98 deals with the next great step in forest conservation work—reforestation. The cut-over and burned-over tracts, much untillable mountain land, and many dry, sandy tracts can be made to grow timber. The Forest Service has taken up in earnest the enormous task of reforesting these millions of acres of waste lands. Bulletin 98 discusses those phases of the main question included under the headings Collection of seed and Direct seeding.

Complete sets of the Handbook of North American Indians north of Mexico (Ethnology Bureau Bulletin 30, 2 parts) are again in the sale stock of the Superintendent of Documents. Owing to the increased cost

of reprinting, it has been found necessary to raise the price of part 1 from $1.25 to $1.50, making the price equal for the two parts.

Vol. 10, Memoirs of the National Academy of Sciences, is out of press. The seven memoirs which it contains have been previously published in as many separate pamphlets. They give the results of researches in the fields of astronomy, botany, medicine, physics, and zoology.

Vol. 16, 2d series, Index-catalogue of the Library of the Surgeon-General's Office, U. S. A., containing the titles alphabeting between Skinko and Stysanus, is now available for distribution by sale through the office of the Superintendent of Documents at $2.00. The first series ended with vol. 16, but as the second series is no further through the alphabet in vol. 16 than the first series was in vol. 13, it is evident that this series will fill several volumes more than were in series one. The volume of medical literature must be growing larger, as indeed is true of the literature of all the sciences. It is the age of science, and science is working wonderful benefits to humanity.

An important document, and one likely to be in much demand, is Senate document 89 of the 62d Congress, Everglades of Florida. It is a compilation of pretty much everything which can throw light on the history, condition, and prospects of the 4000 square miles of presumably fertile but submerged land whose reclamation it is believed will make Florida one of the richest of the States. Included in the publication is the report of the drainage engineers of the Experiment Stations Office, Agriculture Department, once announced for publication as a bulletin of that office, but subsequently withheld for reasons which have not been officially published, though they have been the subject of sundry newspaper speculations. Full accounts are also given of the progress and methods of the work of reclamation, now being prosecuted by the State authorities of Florida. It is gratifying to learn that the work is already one third completed.

The Annual report of the Smithsonian Institution for 1910 brings a fine budget of scientific papers, popular in their form but learned in their information. In cloth $1.10.

Former Senator Aldrich's Suggested plan for monetary legislation, revised edition, which has been published in an unnumbered pamphlet, is now issued also as Senate document 784, part 2, 61st Congress, 3d session.

Another handy tool for entomologists and librarians is An index to Circulars 1 to 100 of the Bureau of Entomology. The index is itself Circular 100. 5 cents.

Annual report of the Steamboat Inspection Service, 1911, further confirms the well known fact that new inventions breed new dangers. The report informs us that motor boats are nowadays the most prolific cause of water accidents.

The first year of Government control of the fur-seal fisheries of Alaska is reported upon in Fisheries Bureau document 749. There is apparently prospect of improved conditions since the termination of the lease system.

Farmers' bulletin 473 is a plain and intelligible statement of the facts in relation to tuberculosis (consumption) in domestic animals. It was

prepared especially for farmers by the international commission of the American Veterinary Medical Association on the control of bovine tuberculosis.

The United States Geological Survey has published Mineralogical notes, series 1, and has announced series 2 under the same title. The denomination "series" for a single publication is justified by the fact that each numbered "series" is made up of several papers, which, combined, constitute a report on the mineralogical work of a geological character conducted by Waldemar T. Schaller in the chemical laboratory of the Survey.

A handy memorandum for medical, surgical, and dental men and women is: Authorized spelling of names of diseases and medical terms, collated from publications issued by the Government Printing Office. 5 cents.

A Census Bureau bulletin of a new kind is Irrigation in Idaho. It is a publication of the 13th census, and its facts will be embodied later in the Special report of the Census on irrigation, and also in the Final reports of the 13th census. Idaho is among the States which have practised irrigation most largely and most successfully.

Forest Service Circular 187, The manufacture and utilization of hickory, is a publication of peculiarly American interest, because hickory grows only in the United States (except a little in Southern Canada), and because for strength, toughness, and elasticity it is the world's foremost wood. Its consumption is large and its value to American manufactures very great. Circular 187 expresses the opinion that the unrivaled efficiency of the American ax is due as much to its hickory helve as to its steel blade, and the success of American farming machinery in all foreign lands is due very largely to the strength and lightness of the hickory used in it. So with light vehicles, spokes in racing sulkies and in motor cars, sucker rods in pumping wells, etc., it is due to hickory that the American products excel all competition. The Circular shows that the supply of hickory is holding out better than was feared, and that with use of the economies which are recommended indefinite continuance may be hoped for.

There is a new print of the Sherman antitrust law, its amendments and the decisions under it, brought up to Nov. 1, 1911. 10 cents.

The Gothenburg system of controlling the liquor traffic in Sweden has been newly written up by an American consul and published by the Manufactures Bureau as Special consular reports 49. An earlier document on the same subject aroused much interest and was widely distributed. The new document describes later experiences.

Vol. 17, Decisions of the Comptroller of the Treasury, July, 1910–June, 1911, is now on sale at $1.50.

Notes on frost, Farmers' bulletin 104, first published in 1899, has been revised and reissued. 5 cents.

A reprint from vol. 26, no. 40, Public health reports, gives extracts from the report of the commission appointed by the Academy of Medicine of Paris on one of the most important of all recent medical topics,

namely, Antityphoid vaccination. A method of controlling the typhoid pestilence seems really to be in sight. But the new remedy is to be used with care. This report says the serum must be used only upon perfectly healthy subjects.

Mines Bureau Bulletin 13 is a Résumé of producer-gas investigations, Oct. 1, 1904–June 30, 1910. The results of the active inquiries into the merits of this new source of energy during nearly six years are here brought together in a single large volume. The Superintendent of Document's price for this document is 65 cents.

The latest document issued by the National Monetary Commission is Dr. Hollander's Bank loans and stock exchange speculation, a brief consideration of a large subject. It has its first publication as Senate document 589, 61st Congress, 2d session. 5 cents.

Vol. 10, History of women in trade unions, is the latest issue in the Labor Bureau's extensive series entitled Report on condition of woman and child wage-earners in the United States. It is a Congressional print, 61st Congress, 2d session, Senate document 645, which is also the number of all the other parts in the same series.

AN IMMORTAL DOCUMENT

The United States Department of State has published in attractive pamphlet form a literal print of the American Declaration of Independence, with the correct names of the 56 signers and a historical note. Copies are on sale by the Superintendent of Documents at 5 cents. The original manuscript document, preserved in the Department of State, has so faded that it is no longer legible.

GOOD DOCUMENTS FRESH FROM THE PRESS

So many new prints bearing titles that promise stores of practical knowledge have come to the table at the last moment that it is possible only to call attention to the attractiveness of their titles:

Cascade Range. Avalanches and forest cover in northern Cascades. (Forest Service Circular 173.) 5 cents.

Children. Provision for exceptional children in public schools. (Education Bureau Bulletin 14, series of 1911.) 10 cents.

Corn. Have you a more productive corn than 1st-generation cross no. 182? (Plant Industry Bureau.) 5 cents.

Cotton goods in Spain and Portugal. (Manufactures Bureau Special agents series 46.) 5 cents.

Crater national forest, its resources and their conservation. (Forest Service Bulletin 100.) 10 cents.

Crops. Government crop reports, their value, scope, and preparation. (Statistics Bureau Circular 17, revised.) 5 cents.

Medical statistics. International military medical statistics for year 1910. (Supplement to annual report of surgeon-general, 1911.)

National Museum. Proceedings of National Museum, vol. 40. $1.00.

Panama Canal. Some problems of Panama Canal; address of Henry L. Stimson, Secretary of War. 5 cents.

—— Treaties and acts of Congress relating to isthmian canal. (Reprinted from Report of Isthmian Canal Commission, 1911.) 5 cents.

Saccharin. Influence of saccharin on nutrition and health of man. (Report 94, Agriculture Department.) 35 cents.

Salmon fisheries of Pacific Coast. (Fisheries Bureau document 751.) 15 cents.

FORTHCOMING PUBLICATIONS

Manufactures Bureau, Commerce and Labor Department, has in press a first supplement to the World trade directory, a very large volume of which there has been a very large sale. The supplement will be an octavo pamphlet of probably 30 or 40 pages. Other supplements will follow as material for them may accumulate. The State Department has instructed the United States consuls in all parts of the world to supply information for this work.

By Senate resolution 237, introduced May 19, 1910, by Senator Borah, and agreed to June 23, 1910, the Labor Bureau was directed to make an investigation of the iron and steel industry in the United States and report the results. This has been done, and the report is now in press as Senate document 110, 62d Congress, 1st session, in 4 vols., under the title Conditions of employment in the iron and steel industry of the United States. It is expected that the first volume will be in the hands of readers at about the same time as this catalogue.

For two years the Statistics Bureau, Agriculture Department, has been collecting information as to the dates of sowing and harvesting the principal crops of all countries. This interesting and valuable information will be given to the public in a series of bulletins, the first of which is now in press.

ARBITRATIONS

Three international arbitrations of the United States with other Powers recently have been concluded. Several volumes of documents were printed in connection with each one, but no copies of these prints are available for distribution to the depository libraries.

1. The Orinoco arbitration with Venezuela. This was heard by the Hague tribunal, which rendered its decision Oct. 25, 1910, allowing only a part of the claims of the United States.

2. The Alsop claim against Chile, in which the King of England acted as arbitrator. This had been pending many years. King George gave his decision in favor of the United States to the amount of a million dollars.

3. The Chamizal tract arbitration, heard by the American-Mexican Boundary Commission, composed of one American and one Mexican representative, with a Canadian statesman, Hon. Eugene Lafleur, as a third member and umpire. El Chamizal was the name of a Mexican farm which by a change of the channel of the boundary river, the Rio Grande, was made American territory, upon which a part of the city of El Paso, Texas, has grown up. The question submitted by the convention of June 24, 1910, was in which country the international title to the tract inheres. The Commission did not answer this question, but the Mexican and Canadian commissioners, June 15, 1911, joined in an award dividing the tract between the two countries. The American

commissioner dissented and the American agent, William C. Dennis, filed a protest.

The hope is felt and expressed that no arbitrations have been lately held of so very confidential a nature that the Superintendent of Documents has been unable to get track of the printed documents in the case.

CATALOGUING CONFIDENTIAL DOCUMENTS

It is of course necessary that some Government documents, such as treaties and conventions, Government cases in international arbitrations, Presidential messages yet undelivered, advance copies sent to newspapers for publication on a future day, and some others, should be printed in secret and held in confidence until officially released. It is also necessary that the official catalogues of public documents shall be compiled, and consequently that the experts who are to compile them shall have copies of the documents which are to be compiled. These two necessities sometimes conflict.

No matter how confidential documents may be considered to be, and no matter how carefully all knowledge of their existence may be guarded at first, they must all, sooner or later, emerge from their concealment and become subject to record in the official catalogues as other documents are. Within a year or two the injunction of secrecy has been removed from certain treaties with Indian tribes which had been held in sacred confidence by several generations of official guardians for 53 years. This, however, was an extreme case. Usually the term of secrecy can be measured in weeks or months or even days. But whether the time be long or short, too often it is sufficient to break the chain of transmission which in regular course brings the documents from the binders or the publishing bureaus to the cataloguers. When first issued, the Public Printer cannot transmit them, because he wisely relieves himself of responsibility for their care by sending the entire edition at once to the publishing Department or bureau. If the documents are—as often happens—the case and countercase and brief and so on of the United States to be presented to some arbitration court, they of course are held in confidence until after they have been presented to the court. After they have been so presented and the arbitration has been concluded and the award made and published, the confidential character of the documents in the case of course ceases. But by that time it too often occurs that all parties concerned have forgotten—some of them have never known—that there is a law requiring all authorities who are responsible for the printing and publishing of documents to see to it that the Superintendent of Documents, under whose direction the catalogues are compiled and printed, shall be supplied with copies, to be duly catalogued and thus incorporated into the public official record by whose aid the future histories of the country must be written. Sometimes by effort, sometimes by chance, the Superintendent of Documents usually learns, sooner or later—and a few times it has been disastrously later—that there are documents once confidential, but from which the injunction of secrecy at last has been removed, which should be at once secured for the use of the cataloguers and for preservation in the extensive library

of public documents which has been built up by preserving catalogued copies and by other legitimate means without a penny's cost to the Government.

It is not often easy—sometimes it is very difficult—for the Superintendent of Documents to secure so much as a single copy of the confidential documents even after they have reached the release stage, while the 500 depository libraries, which are entitled by law to receive everything have no chance whatever to get copies.

There are several reasons for this. As the documents are not to have, in their first or confidential form, more than a very limited distribution, but a small number is printed. As it is not required that documents, while under confidential restriction, shall be sent to the depository libraries, no allotment is printed for them. No thought is given to the fact that confidential documents will soon cease to be secret, and will become part and parcel of the open historical records of the country, and that then the entry of their titles in the official catalogues and the supply of copies to the principal libraries of the country for preservation are required by the spirit if not by the express letter of the law.

Those documents of arbitrations and other confidential proceedings which are subsequently reprinted as Congressional documents reach the depository libraries through that channel. But there are many once confidential documents which are not thus reprinted. The present year has seen the conclusion of three international arbitrations—the Chamizal tract arbitration with Mexico, the Orinoco claim arbitration with Venezuela, and the Alsop claim arbitration with Chile. Of the documents in the case of only one of these has the Superintendent of Documents yet been able to secure a complete set, while not a single copy of any volume has been secured for distribution to the depository libraries. And there is always the chance that there are other like sets of whose existence the Superintendent of Documents has not yet learned.

How can a cataloguer catalogue if the things to be catalogued cannot be procured? How can the depository libraries make the public documents accessible to citizens of all parts of the country if numerous important documents are not permitted to reach their shelves?

Librarians, bibliographers, historical students, and statesmen will be of one mind on the question, Should not legislation be enacted to secure a better supply of the confidential documents of the Government to the official cataloguers and the official libraries?

CORRIGENDA

American Historical Association Report, 1909, page 160, footnote, reads: "S. doc. 1 and H. doc. 2, 2nd sess., 60th Congress." Instead of "60th Congress" read "16th Congress". The document to which reference is made is the first Constitution of Missouri, enacted in July, 1820, and ordered printed by the United States Senate Nov. 14 and by the House of Representatives Nov. 16, 1820. The term of the 60th Congress began Mar. 4, 1907, and ended Mar. 4, 1909.

In the Congressional record, 56th Cong. 1st sess., Index volume, page 613, under heading Ryan, William H., a Representative from New York,

last item under the subheading Bills and joint resolutions introduced by, is found in parentheses the phrase (See bill S. 4718). Instead of "S." read "H." It was a House bill. Mr. Ryan could not possibly have introduced a Senate bill. This particular bill was an important one relating to the Seneca nation of Indians and a considerable town which has grown up on their reservation in Western New York. It became a law in the 56th Cong., 2d sess. (Stat, L. v. 31, p. 819.)

Senate report 1281, 61st Congress, which was issued during the 3d session, is entitled Report of the Committee on Irrigation and Reclamation of Arid Lands on the investigation of irrigation projects. It carries on its title-page in parentheses the words (To accompany S. Res. 324). As the Congress by which this no. 324 was issued is not mentioned, the natural conclusion would be that it is the same Congress by which Report 1281 was issued. This, however, is not the case. Senate resolution 324 of the 61st Congress does not relate in any way to the irrigation investigation. By searching the Congressional Record it is found that the irrigation inquiry was authorized by the 60th Congress at its 2d session, but not by virtue of Senate resolution 324. It was by Resolution 319 that the investigation was set afoot. The parenthetical clause (To accompany S. res. 324) on the title-page of Senate rp. 1281, 61st Cong. 3d sess., should therefore be changed to read (To accompany S. res. 319, 60th Cong., 2nd sess.). Report 1281 and Resolutions 319 and 324 all had mishaps of their own in the course of editing and printing, but as these have all been straightened out except the erroneous Resolution number, they need not be detailed here. In the rush of numbering and printing between dark and dawn the thousands upon thousands of Congressional bills, resolutions, reports, and documents, it is almost miraculous that so small a percentage of errors occurs.

Congressional record index, 59th Congress, 1st session, History of House bills, H. R. 11946, 2d line in the 6-point type, instead of (H. R. Report 558) read (H. R. Report 1558). This is a favorable report from the Committee on Indian Affairs on a bill providing for the allotment of Indian lands in severalty.

There is a supposition abroad that in or about 1872 Congress investigated the South Improvement Company, an early combination of oil interests which became so odious that the Pennsylvania Legislature was constrained to conciliate public opinion by repealing its charter in the year named. The indexes to the public documents reveal very little to sustain this supposition. In vol. 1, Report of the Industrial Commission, page 147, is a statement that William G. Warden gave testimony before a Committee of Congress, March 30, 1872, in which he included a list of the stockholders and the amount of their holdings. A footnote on the same page says: "It appears from the testimony of Mr. Emery that the Committee of Congress referred to did not publish any report, and possibly did not even keep a record of the testimony taken. The chairman of the Committee was Mr. Gilfillin. Mr. Emery was in Washington at the time and has a complete copy of the testimony, taken either from newspapers or directly from stenographers. Mr. Boyle confirms the fact that there was such an investigation." There is a discrepancy here. March

30, 1872, when it is said that Mr. Warden's testimony was given, is in the period of the 42d Congress, 2d session. Mr. Calvin W. Gilfillan of Franklin, Pa., said to have been chairman of the committee of investigation, was not a member of the 42d Congress. He served only in the 41st Congress, having been defeated for reelection to the 42d Congress. It is evident, therefore, either that the investigation was not held in March, 1872, or that Mr. Gilfillan was not chairman of the committee. It is, by the way, improbable that a one-term member should be chairman of a committee, or even of a subcommittee designated to hear evidence. At page 668, Industrial Commission Report, vol. 1, both Mr. Lewis Emery, jr., and Mr. Patrick Boyle, editor of the Oil City Derrick, give interesting information as to the difficulty of getting copies of the evidence taken by the committees investigating oil matters, not only in 1872 but in 1888 as well.

CORRECTION FOR AUGUST, 1911, MONTHLY CATALOGUE

For "1911" in 3d line of 2d entry under subhead Fruit under Plant Industry Bureau on page 76, read "1910." corrected

MONTHLY CATALOGUE

No. 203 NOVEMBER 1911

AGRICULTURE DEPARTMENT

NOTE.—Those publications of the Department of Agriculture, which are for sale will be supplied by the Superintendent of Documents, Washington, D. C. The Department issues a monthly list of publications, which is mailed to all applicants, enabling them to select such reports and bulletins as interest them.

Before Attorney General in re inspection, under act of June 30, 1906, of meat food products derived from carcasses of animals which did not receive post-mortem inspection under that act, question submitted by Secretary of Agriculture; brief of solicitor. 1911. cover-title, 41 p. ‡

[Bureau of Animal Industry] order 183 rule 1 revision 8, 184, 185; Nov. 1-13, 1911. [1911.] [Consist of orders concerning quarantine of cattle, etc.] †

Influence of saccharin on nutrition and health of man: Report of Referee Board of Consulting Scientific Experts; Influence of saccharin on digestion, metabolism, nutrition, and general health [with bibliography], by Christian A. Herter; Effect of saccharin on health, nutrition, and general metabolism of man, by Otto Folin. Nov. 15, 1911. 375 p. (Report 94.) * Paper, 35c. Agr 11—2039/4

Notice of judgment 1125-54, food and drugs act. Nov. 9, 1911. †

ANIMAL INDUSTRY BUREAU

Diagnosis of glanders by complement fixation; by John R. Mohler and Adolph Eichhorn. Apr. 7, 1911, reprint Oct. 1911, with slight revision. 32 p. 5 pl. (Bulletin 136.) * Paper, 15c. Agr 11—480/4

Directory of bureau. Oct. 1, 1911. 66 p. * Paper, 5c. Agr 10—511/2

Methods and results of paraffining cheese; by C. F. Doane. Nov. 1, 1911. 16 p. (Circular 181.) * Paper, 5c. Agr 11—2040/2

Service announcements 55; Nov. 15, 1911. [1911.] p. 79-84. [Monthly.] ‡ Agr 7—I658/ 2

Spontaneous oxidation of arsenical dipping fluids; by Aubrey V. Fuller. Nov. 9, 1911. 8 p. (Circular 182.) * Paper, 5c. Agr 11—2028/3

Tuberculosis, plain statement of facts regarding disease, prepared especially for farmers and others interested in live stock; by international commission of American Veterinary Medical Association on control of bovine tuberculosis. Nov. 14, 1911. 23 p. il. (Agriculture Dept. Farmers' bulletin 473.) * Paper, 5c. Agr 11—2038/2

BIOLOGICAL SURVEY BUREAU

Rabbit as farm and orchard pest; by D. E. Lantz. Reprint Nov. 1911. ii+329-342 p. il. 2 pl. ([Yearbook] separate 452.) [From Yearbook, 1907.] * Paper, 5c.

CHEMISTRY BUREAU

Analyses of sugar beets, 1905–10, with methods of sugar determination [with bibliography]; by A. Hugh Bryan. Nov. 28, 1911. 48 p. il. 2 pl. (Bulletin 146.) * Paper, 10c. Agr 11—2170

Enological studies: Chemical composition of American grapes grown in Ohio, New York, and Virginia; by William B. Alwood. Nov. 20, 1911. 35 p. (Bulletin 145.) * Paper, 5c. Agr 11—2047/3

Some technical methods of testing miscellaneous supplies, including paints and paint materials, inks, lubricating oils, soaps, etc.; by Percy H. Walker. Revised, Feb. 28, 1910. Reprint Nov. 18, 1911. 68 p. il. (Bulletin 109 revised.) * Paper, 10c. Agr 10—430/2

ENTOMOLOGY BUREAU

Fig moth [with bibliography], by F. H. Chittenden; Report on fig moth in Smyrna, by E. G. Smyth. Nov. 4, 1911. 65 p. il. 16 pl. (Bulletin 104.) * Paper, 20c. Agr 11—2030/3

Index to Circulars 1–100 of bureau; by Rolla P. Currie and Andrew N. Caudell. Nov. 2, 1911. ii+49 p. (Circular 100.) * Paper, 5c. Agr 11—2032

Papers on deciduous fruit insects and insecticides: Notes on peach and plum slug; by R. A. Cushman. Nov. 6, 1911. iv+91–102 p. il. 1 pl. (Bulletin 97, pt. 5.) * Paper, 5c. Agr 11—2029/4

Papers on insects affecting vegetables: Hawaiian beet webworm [with bibliography], by H. O. Marsh; with appendix, by H. G. Dyar and F. H. Chittenden. Nov. 6, 1911. iii+1–15 p. il. 1 pl. (Bulletin 109, pt. 1.) * Paper, 5c. Agr 11—2031/4

Same: Southern beet webworm; by F. H. Chittenden. Nov. 11, 1911. iii+17–22 p. il. (Bulletin 109, pt. 2.) * Paper, 5c. Agr 11—2042/2

Rocky Mountain spotted fever tick, with special reference to problem of its control in Bitter Root Valley in Montana [with bibliography]; by W. D. Hunter and F. C. Bishopp. Nov. 17, 1911. 47 p. il. 3 pl. (Bulletin 105.) [Prepared in cooperation with Biological Survey Bureau and Montana Agricultural College.] * Paper, 10c. Agr 11—2041/4

EXPERIMENT STATIONS OFFICE

County schools of agriculture and domestic economy in Wisconsin; by A. A. Johnson. Nov. 9, 1911. 24 p. il. 5 pl. (Bulletin 242.) * Paper, 10c. Agr 11—2033/3

Development of methods of draining irrigated lands; by C. G. Elliott. 1911. iv+489–501 p. il. 4 pl. ([Publication] 1394.) [From Report, 1910.] * Paper, 5c.

Experiment station work 66; Sept. 1911. Nov. 16, 1911. 24 p. il. (Agriculture Dept. Farmers' bulletin 469.) * Paper, 5c. Agr 6—305/3

Land drainage by means of pumps; by S. M. Woodward. Nov. 8, 1911. 44 p. il. 5 pl. (Bulletin 243.) * Paper, 10c. Agr 11—2034/4

PORTO RICO AGRICULTURAL EXPERIMENT STATION

Relation of calcareous soils to pineapple chlorosis; by P. L. Gile. Nov. 7, 1911. 45 p. 2 pl. (Bulletin 11; Experiment Stations Office, [publication] 1377.) * Paper, 10c. Agr 11—2035/4

FOREST SERVICE

COAST AND GEODETIC SURVEY.

NOTE.—The monthly Notice to mariners, formerly issued by the Coast and Geodetic Survey, has been consolidated with and made a part of the Notice to mariners issued by the Lighthouses Bureau, thus making it a joint publication. The charts, coast pilots, and tide tables of the Coast and Geodetic Survey are sold at the office of the Survey in Washington, and also by one or more sales agents in each of the important American seaports.

Results of observations made at Coast and Geodetic Survey magnetic observatory at Vieques, P. R., 1907–08; by Daniel L. Hazard. 1911. 98 p. il. 9 pl. 4° * Paper, 15c. 10—35894/4

Survey of oyster bars, Baltimore County, Md., description of boundaries and landmarks and report of work of survey in cooperation with Bureau of Fisheries and Maryland Shell Fish Commission; by C. C. Yates. 1911. 42 p. map, large 8° * Paper, 10c. F11—377

Survey of oyster bars, St. Marys County, Md., description of boundaries and landmarks and report of work of survey in cooperation with Bureau of Fisheries and Maryland Shell Fish Commission; by C. C. Yates. 1911. 203 p. map, large 8° * Paper, 30c. F11—378

Tide tables, [calendar] year 1912 [with list of references]. 2d edition. 1911. 536+[1] p. il. large 8° * Paper, 50c. 11—35919

Tide tables for Atlantic Coast of United States, including Canada and West Indies, from Tide tables, [calendar year] 1912. 2d edition. 1911. [181] p. il. large 8° † Paper, 15c. 11—35916

Tide tables for Pacific Coast of United States, with foreign ports in Pacific Ocean; from Tide tables, [calendar year] 1912. 2d edition. 1911. [165] p. large 8° † Paper, 10c. 11—35917

United States coast pilot, Atlantic Coast: pt. 7, Chesapeake Bay entrance to Key West [supplement to 3d edition]. Oct. 10, 1911. 30 l. large 8° † 10—19054

Charts

Annapolis Harbor, Chesapeake Bay, Md., original surveys 1888 and 1910; chart 385. Scale 1:10,000. Washington, Coast and Geodetic Survey, Oct. 1911. 33.1 × 31.3 in. † 50c.

Beaufort Harbor, N. C.; chart 420. Scale 1:40,000. Washington, Coast and Geodetic Survey, Oct. 1911. 24.2 × 22.6 in. † 25c.

Chesapeake Bay entrance, Va., original surveys 1851–1911, additions from Geological Survey to 1907 and from U. S. Engineers to 1910; chart 131. Scale 1:80,000. Washington, Coast and Geodetic Survey, Oct. 1911. 30.3 × 40.1 in. † 50c.

Georgia Strait and Strait of Juan de Fuca, Wash.; chart 6300. Scale 1:200,000. Washington, Coast and Geodetic Survey, Oct. 1911. 27.1 × 38.6 in. † 50c.

Iligan Bay and vicinity, P. I., original surveys 1904–10 and other sources; chart 4604. [Scale 1:200,000.] Washington, Coast and Geodetic Survey, Oct. 1911. 31.3 × 41.1 in. † 50c.

Long Island Sound, north shore of, Sheffield Island to Westcott Cove, Conn.; chart 268. Scale 1:10,000. Washington, Coast and Geodetic Survey, Oct. 1911. 36.8 × 34.3 in. † 50c.

Luzon, Southeastern, Masbate, and northern Samar, from United States and foreign sources; chart 4715. Mercator projection. Washington, Coast and Geodetic Survey, Oct. 1911. 31.2 × 41.7 in. † 50c.

Masbate, P. I., Harbors on coast of; chart 4455. Washington, Coast and Geodetic Survey, Oct. 1911. 35.8 × 26.2 in. † 30c.
Barrera, Port, northeast coast of Masbate, from survey in 1911, Mining Bureau survey in 1904, and other sources. Scale 1:30,000. 20.1 × 14.4 in.
Cataingan, Port, east coast of Masbate, from Spanish survey in 1890. Scale 1:30,000. 15.8 × 11.8 in.
Masbate Harbor, northeast coast of Masbate, from Spanish survey in 1892. Scale 1:20,000. 15.7 × 11.8 in.
Nin Bay and Port Mandaon, west coast of Masbate, from Spanish survey in 1895. Scale 1:30,000. 20 × 14.4 in.

Mississippi River, from passes to Grand Prairie, La.; chart 194. Scale 1:80,000. Washington, Coast and Geodetic Survey, Oct. 1911. 40.7 × 32.6 in. † 50c.

Ossabaw Sound, Vernon and Ogeechee rivers, Ga.; chart 441. Scale 1:30,000. Washington, Coast and Geodetic Survey, Nov. 1911. 24×36.7 in. † 25c.

Philippine Islands, northern part, Manila Bay to Formosa, original surveys 1901–08 and other sources; chart 4705. [Scale 1:800,000.] Washington, Coast and Geodetic Survey, Oct. 1911. 43.6×28.1 in. † 50c.

Santa Monica Bay, Cal., original surveys 1871–93, topography revised in 1910; chart 5144. Scale 1:40,000. Washington, Coast and Geodetic Survey, Oct. 1911. 34×21.9 in. † 25c.

Tañon Strait, southern part, Negros and Cebu, P. I.; chart 4430. Scale 1:100,000. Washington, Coast and Geodetic Survey, Oct. 1911. 41.8×30.9 in. † 40c.

FISHERIES BUREAU

Bulletin, 1909. 1911. v. 29, ix+[1]+445 p. il. 50 pl. large 8° (H. doc. 122, 61st Cong. 2d sess.) [For contents see entry of this publication without Congressional document number in Monthly catalogue for October, 1911, p. 198.] * Cloth, $1.35. 9—35239/3

Fur-seal fisheries of Alaska in 1910; [by Walter I. Lembkey]. 1911. [1]+40 p. (Bureau of Fisheries doc. 749.) * Paper, 5c. F11—1/5

Rules and regulations regarding reindeer service in Alaska. 1911. 12 p. (Whole no. 466.) * Paper, 5c.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geo-

logic folios (either Library or Field editions), whenever the sum transmitted solely for folios at the wholesale price amounts to at least $5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington. For topographic sheets see page 252.

Asphalt. Production of asphalt, related bitumens, and bituminous rock, [calendar year] 1910 [with list of survey publications on asphalt]; by David T. Day. 1911. 9 p. [From Mineral resources, 1910.] † Paper; * paper, 5c.

Coal. Production of coal, [calendar year] 1910 [with list of references], by Edward W. Parker; [with Classified list of papers dealing with coal, coke, lignite, and peat contained in publications of Geological Survey, by John M. Nickles and Willis T. Lee]. 1911. 241 p. il. 14 maps. Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

More than one-third of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least $3.00.

Alaska, Prince of Wales Island, Copper Mountain and vicinity, lat. 55° 10′ 30″–55° 17′ 30″, long. 132° 30′ 30″–132° 40′. Scale 1:62,500, contour interval 100 ft. [Washington, Geological Survey] edition of [1911]. 8.2×7 in. † 5c.

California, Gilsizer Slough, lat. 39°–39° 07′ 30″, long. 121° 37′ 30″–121° 45′. Scale 1:31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Sept. 1911. 17.3×13.5 in. † 5c.

California, Grimes quadrangle, lat. 39°–39° 07′ 30″, long. 121° 52′ 30″–122°. Scale 1:31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Aug. 1911. 17.3×13.5 in. † 5c.

California, Mills quadrangle, lat. 38° 30′–38° 37′ 30″, long. 121° 15′–121° 22′ 30″. Scale 1:31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Aug. 1911. 17.3×13.6 in. † 5c.

California, Ostrom quadrangle, lat. 39°–39° 07′ 30″, long. 121° 30′–121° 37′ 30″. Scale 1:31,680, contour interval 5 ft. [Washington, Geological Survey] edition of July, 1911. 17.3×13.5 in. † 5c.

California, Sutter quadrangle, lat. 39° 07′ 30″–39° 15′, long. 121° 37′ 30″–121° 45′. Scale 1:31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Sept. 1911. 17.3×13.4 in. † 5c.

California, Yuba City quadrangle, lat. 39° 07′ 30″–39° 15′, long. 121° 30′–121° 37′ 30″. Scale 1:31,680, contour interval 5 ft. [Washington, Geological Survey] edition of July, 1911. 17.3×13.4 in. † 5c.

Colorado, De Beque oil field, lat. 39° 20′–39° 25′, long. 108° 10′–108° 20′. Scale 1:62,500, contour interval 50 ft. [Washington, Geological Survey] edition of Sept. 1911. 12.3×12 in. † 5c.

Idaho-Wyoming-Utah, Montpelier quadrangle, lat. 42°–42° 30′, long. 111°–111° 30′. Scale 1:125,000, contour interval 50 ft. [Washington, Geological Survey] edition of Sept. 1911. 17.5×13 in. † 5c.

Ohio, Cumberland quadrangle, lat. 39° 45′–40°, long. 81° 30′–81° 45′. Scale 1:62,500, contour interval 20 ft. [Washington, Geological Survey] edition of Aug. 1911. 17.5×13.5 in. † 5c.

Ohio, Oxford quadrangle, lat. 39° 30′–39° 45′, long. 84° 30′–84° 45′. Scale 1:62,500, contour interval 20 ft. [Washington, Geological Survey] edition of Aug. 1911. 17.5×13.5 in. † 5c.

Ohio, Spencerville quadrangle, lat. 40° 30′–40° 45′, long. 84° 15′–84° 30′. Scale 1:62,500, contour interval 10 ft. [Washington, Geological Survey] edition of June, 1911. 17.5×13.3 in. † 5c.

Ohio, Summerfield quadrangle, lat. 39° 45′–40°, long. 81° 15′–81° 30′l Scale 1:62,500, contour interval 20 ft. [Washington, Geologica. Survey] edition of Aug. 1911. 17.5×13.5 in. † 5c.

Oklahoma, Sallisaw quadrangle, lat. 35°–35° 30′, long. 94° 30′–95°. Scale 1:125,000, contour interval 50 ft. [Washington, Geological Survey] edition of Sept. 1911. 17.5×14.4 in. † 5c.

Oklahoma, Sansbois quadrangle, lat. 35°–35° 30′, long. 95°–95° 30′. Scale 1:125,000, contour interval 50 ft. [Washington Geological Survey] edition of Aug. 1911. 17.5×14.4 in. † 5c.

Sacramento Valley, Cal., Topographic map of, lat. 38°–40° 15′, long. 121° 122° 15′. Scale 1:250,000, contour interval 25 and 250 ft. [Washington, Geological Survey] edition of Oct. 1911. 39.4×17.3 in. †15c.

Wyoming, Shoshone quadrangle, lat. 44°–44° 30′, long. 110° 30′–111°. Scale 1:125,000, contour interval 100 ft. [Washington, Geological Survey] edition of Sept. 1911. 17.5×12.7 in. † 5c.

New publications, list 6; Oct. 1911. [1911.] oblong 48° [These lists are published in the form of postal cards.] †

Résumé of producer-gas investigations, Oct. 1904–June, 1910 [with bibliography; articles] by R. H. Fernald and C. D. Smith. 1911. xii+393 p. il. 33 pl. (Bulletin 13.) * Paper, 65c. 11—35893

PATENT OFFICE

NOTE.—The Patent Office publishes Specifications and drawings of patents, both in single copies and monthly volumes. The single copies are not enumerated in this catalogue, but may be obtained for 5c. each at the Patent Office. The Superintendent of Documents sells the monthly volumes at $5.00 per volume or $60 per year, and back numbers, prior to 1907, may be had at $3.00 per volume or $36 per year.

A variety of indexes, giving a complete view of the work of the Patent Office from 1790 to date, are published at prices ranging from 25c. to $10 per volume and may be obtained from the Superintendent of Documents. The Rules of practice and pamphlet Patent laws are furnished free of charge upon application to the Patent Office. The Patent Office issues coupon orders in packages of 20 at $1.00 per package, or in books containing 100 coupons at $5.00 per book. One coupon will procure a specification with drawing. These coupons are good until used, but are only to be used for orders sent to the Patent Office. For schedule of office fees, address Chief Clerk, Patent Office.

Alphabetical list of patentees to whom patents were issued on 14th of November, 1911 [with list of inventions]. [1911.] xxix p. large 8° [From Official gazette, v. 172, no. 2.] † Paper, 5c. single copy, $1.00 a yr.

In Supreme Court of District of Columbia, at law no. 54011, United States ex relatione Isabella Scott and David J. Scott, executors of Walter Scott, *v.* Edward B. Moore, commissioner of patents, and Frederick A. Tennant, assistant commissioner of patents; brief for respondents. [1911.] cover-title, 30 p. ‡

TOPOGRAPHY DIVISION

NOTE.—Since February, 1908, the Topography Division has been preparing rural-delivery maps of counties in which rural-delivery is completely established. They are published in two forms, one giving simply the rural free delivery routes starting from a single given post office, sold at 10 cents each; the other, the rural free delivery routes in an entire county, sold at 50 cents each. A uniform scale of 1 inch to 1 mile is used. Editions are not issued, but sun-print copies are produced in response to special calls addressed to the Disbursing Clerk, Post-Office Department. These maps should not be confused with the post route maps for which see Monthly catalogue for January, 1911, page 367.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are: 1, Contributions to knowledge; 2, Miscellaneous collections; 3, Annual reports; 4, Special publications. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The *volumes* of Contributions and of Miscellaneous collections are distributed only to public libraries and to learned institutions and societies in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remains to supply demands from other sources. No general mailing list of individuals is maintained. The reports can be had by purchase from the Superintendent of Documents, Washington, D. C. The papers printed in the annual reports are published separately for *free* distribution. Publications should be ordered by the *serial number*. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

Agassiz, Alexander. Alexander Agassiz, 1835–1910; by Alfred Goldsborough Mayer. 1911. [1]+447–472 p. 1 por. (Publication 2036.) [From Report, 1910.] †

Animals. Significance of pulse rate in vertebrate animals [with list of references]; by Florence Buchanan. 1911. [1]+487–505 p. il. (Publication 2038.) [From Report, 1910.] †

Astronomical problems of southern hemisphere; by Heber D. Curtis. 1911. [1]+329–340 p. il. (Publication 2028.) [From Report, 1910.] †

Astrophysics. Recent progress in astrophysics in United States; by J. Bosler. 1911. [1]+357–370 p. 8 p. of pl. (Publication 2030.) [From Report, 1910.] †

Bows and arrows. Origin of west African crossbows; by Henry Balfour. 1911. [1]+635–650 p. il. 1 pl. (Publication 2047.) [From Report, 1910.] †

Cave dwellings of Old and New Worlds; by J. Walter Fewkes. 1911. [1]+613–634 p. 1 pl. 10 p. of pl. (Publication 2046.) [From Report, 1910.] †

Druidism. Origin of Druidism; by Julius Pokorny. 1911. [1]+583–597 p. (Publication 2044.) [From Report, 1910.] †

Ear-flower. Sacred ear-flower of Aztecs, xochinacaztli; by William Edwin Safford. 1911. [1]+427–431 p. il. 1 pl. (Publication 2034.) [From Report, 1910.] †

Earth. Future habitability of the earth; by Thomas Chrowder Chamberlin. 1911. [1]+371–389 p. (Publication 2031.) [From Report, 1910.] †

Explosives. Some modern developments in methods of testing explosives; by Charles E. Munroe. 1911 [1]+291–306 p. 12 p. of pl. (Publication 2025.) [From Report, 1910.] †

Ferns. On Psomiocarpa, neglected genus of ferns; by H. Christ. Washington, Smithsonian Institution, Nov. 21, 1911. [2]+4 p. il. 1 pl. (Publication 2054; Smithsonian miscellaneous collections, v. 56, no. 23.) † Paper, 5c.

Ferns—Continued. Remarkable new fern from Panama; by William R. Maxon. Washington, Smithsonian Institution, Nov. 22, 1911. [2]+5 p. 3 pl. (Publication 2055; Smithsonian miscellaneous collections, v. 56, no. 24.) † Paper, 10c. 11—35931

Flying. Recent progress in aviation; by Octave Chanute. 1911. [1]+145–167 p. 1 pl. 18 p. of pl. (Publication 2018.) [From Report, 1910.] †

Forest preservation; by Henry S. Graves. 1911. [1]+433–445 p. 1 pl. 6 p. of pl. (Publication 2035.) [From Report, 1910.] †

Fuller, Melville W. Melville Weston Fuller, 1833–1910; by Charles D. Walcott. 1911. [1]+113–123 p. 1 por. (Publication 2016.) [From Report, 1910.] †

Grass-warbler. Descriptions of 7 new African grass-warblers of genus Cisticola; by Edgar A. Mearns. Washington, Smithsonian Institution, Nov. 23, 1911. [2]+6 p. (Publication 2056; Smithsonian miscellaneous collections, v. 56, no. 25.) † Paper, 5c. 11—35932

Histology. Manifested life of tissues outside of organism; by Alexis Carrel and Montrose T. Burrows. 1911. [1]+573–582 p. (Publication 2043.) [From Report, 1910.] †

Hoactzin. Contribution to ecology of adult hoatzin [with bibliography]; by C. William Beebe. 1911. [1]+527–543 p. il. 1 pl. 6 p. of pl. (Publication 2040.) [From Report, 1910.] †

Huggins, Sir William. Sir William Huggins; by W. W. Campbell. 1911. [1]+307–317 p. 1 por. (Publication 2026.) [From Report, 1910.] †

Ions. Isolation of ion, precision measurement of its charge, and correction of Stokes's law; by R. A. Millikan. 1911. [1]+231–256 p. il. (Publication 2022.) [From Report, 1910.] †

Irrigation. Progress in reclamation of arid lands in western United States; by F. H. Newell. 1911. [1]+169–198 p. il. 12 p. of pl. (Publication 2019.) [From Report, 1910.] †

Isostasy. What is terra firma? review of current research in isostasy; by Bailey Willis. 1911. [1]+391–406 p. 1 pl. 2 p. of pl. (Publication 2032.) [From Report, 1910.] †

Matter. Modern ideas on constitution of matter; by Jean Becquerel. 1911. [1]+275–290 p. (Publication 2024.) [From Report, 1910.] †

Mississippi River. Electric power from river; by Chester M. Clark. 1911. [1]+199–210 p. 8 p. of pl. (Publication 2020.) [From Report, 1910.] †

Ostrich. Plumages of ostrich; by J. E. Duerden. 1911. [1]+561–571 p. 8 p. of pl. (Publication 2042.) [From Report, 1910.] †

Photographs. Telegraphy of photographs, wireless and by wire; by T. Thorne Baker. 1911. [1]+257–274 p. il. 2 pl. (Publication 2023.) [From Report, 1910.] †

Plover. Migration of Pacific plover to and from Hawaiian Islands; by Henry W. Henshaw. 1911. [1]+545–559 p. (Publication 2041.) [From Report, 1910.] †

Report. Annual report of regents, year ending June 30, 1910 [with report of secretary, etc., and appendix containing scientific papers]. 1911. vii+688 p. il. 3 por. 11 pl. 114 p. of pl. map. ([Publication 2050.]) * Cloth, $1.10. 4—18264/2 [also analytical cards].

CONTENTS.—Report of secretary.—Report of executive committee.—Proceedings of regents.—Melville Weston Fuller, 1833–1910; by Charles D. Walcott.—Ornamentation of rugs and carpets; by Alan S. Cole.—Recent progress in aviation; by Octave

Chanute.—Progress in reclamation of arid lands in western United States; by F. H. Newell.—Electric power from Mississippi River; by Chester M. Clark.—Safety provisions in United States Steel Corporation; by David S. Beyer.—Isolation of ion, precision measurement of its charge, and correction of Stokes's law; by R. A. Millikan.—Telegraphy of photographs, wireless and by wire; by T. Thorne Baker.—Modern ideas on constitution of matter; by Jean Becquerel.—Some modern developments in methods of testing explosives; by Charles E. Munroe.—Sir William Huggins; by W. W. Campbell.—Solar constant of radiation; by C. G. Abbot.—Astronomical problems of southern hemisphere; by Heber D. Curtis.—Progressive disclosure of entire atmosphere of the sun; by H. Deslandres.—Recent progress in astrophysics in United States; by J. Bosler.—Future habitability of the earth; by Thomas Chrowder Chamberlin.—What is terra firma? review of current research in isostasy; by Bailey Willis.—Transpiration and ascent of sap; by Henry H. Dixon.—Sacred ear-flower of Aztecs, xochinacaztli; by William Edwin Safford.—Forest preservation; by Henry S. Graves.—Alexander Agassiz, 1835-1910; by Alfred Goldsborough Mayer.—Recent work on determination of sex; by Leonard Doncaster.—Significance of pulse rate in vertebrate animals [with list of references]; by Florence Buchanan.—Natural history of solitary wasps of genus Synagris [with bibliography]; by E. Roubaud.—Contribution to ecology of adult hoatzin [with bibliography]; by C. William Beebe.—Migration of Pacific plover to and from Hawaiian Islands; by Henry W. Henshaw.—Plumages of ostrich; by J. E. Duerden.—Manifested life of tissues outside of organism; by Alexis Carrel and Montrose T. Burrows.—Origin of Druidism; by Julius Pokorny.—Geographical and statistical view of contemporary Slav peoples; by Lubor Niederle.—Cave dwellings of Old and New Worlds; by J. Walter Fewkes.—Origin of west African crossbows; by Henry Balfour.—Sanitation on farms; by Allen W. Freeman.—Epidemiology of tuberculosis; by Robert Koch.

Rugs. Ornamentation of rugs and carpets; by Alan S. Cole. 1911. [1]+125-144 p. 6 p. of pl. (Publication 2017.) [From Report, 1910.] †

Safety provisions in United States Steel Corporation; by David S. Beyer. 1911. [1]+211-229 p. 1 pl. 10 p. of pl. (Publication 2021.) [From Report, 1910.] †

Sanitation on farms; by Allen W. Freeman. 1911. [1]+651-657 p. (Publication 2048.) [From Report, 1910.] †

Sap. Transpiration and ascent of sap; by Henry H. Dixon. 1911. [1]+407-425 p. il. (Publication 2033.) [From Report, 1910.] †

Sex. Recent work on determination of sex; by Leonard Doncaster. 1911. [1]+473-485 p. (Publication 2037.) [From Report, 1910.] †

Slavs. Geographical and statistical view of contemporary Slav peoples; by Lubor Niederle. 1911. [1]+599-612 p. map. (Publication 2045.) [From Report, 1910.] †

Solar radiation. Solar constant of radiation; by C. G. Abbot. 1911. [1]+319-328 p. (Publication 2027.) [From Report, 1910.] †

Sun. Progressive disclosure of entire atmosphere of the sun; by H. Deslandres. 1911. [1]+341-356 p. il. 4 p. of pl. (Publication 2029.) [From Report, 1910.] †

Tuberculosis. Epidemiology of tuberculosis; by Robert Koch. 1911. [1]+659-674 p. il. (Publication 2049.) [From Report, 1910.] †

Wasps. Natural history of solitary wasps of genus Synagris [with bibliography]; by E. Roubaud. 1911. [1]+507-525 p. 4 p. of pl. (Publication 2039.) [From Report, 1910.] †

AMERICAN HISTORICAL ASSOCIATION

10th report of Public Archives Commission with appendices, 1909; edited by Herman V. Ames. 1911. [2]+323-490 p. [From Report, 1909.] † CA 10—2766

CONTENTS.—10th annual report of commission.—Proceedings of 1st annual conference of archivists.—American archival problems; by Waldo G. Leland.—Lessons of British archives; by Charles M. Andrews.—Lessons of German archives; by Marion Dexter Learned.—Lessons of Italian archives; by Carl Russel Fish.—Lessons of Dutch archives; by William I. Hull.—Lessons of Spanish archives; by William R. Shepherd.—Lessons of Swedish archives; by Amandus Johnson.—Tragedies in New York's public records; by Victor Hugo Paltsits.—Archives of Illinois; by Clarence Walworth Alvord and Theodore Calvin Pease.—Preliminary report on archives of New Mexico; by John H. Vaughan.

ETHNOLOGY BUREAU

27th annual report [with accompanying paper, fiscal year] 1906. 1911. 672 p. il. 27 por. 37 pl. 2 maps, large 8° ([Publication 2057.]) * Cloth, $1.50. 7—38073/6

CONTENTS.—Report of chief.—Omaha tribe; by Alice C. Fletcher and Francis La Flesche.

NATIONAL MUSEUM

NOTE.—The publications of the National Museum comprise bulletins, annual reports, and an annual volume of Proceedings. The annual report is included in the Congressional set. The editions of the bulletins and Proceedings are too limited to admit of general distribution, and the volumes of the latter are sent only to libraries.

Proceedings. 1911. v. 40, xi+670 p. il. 70 pl. map. [Articles 1808–45 are included in this volume. Each article is also published separately in advance.] * Paper, $1.00. 11—20830/3

CONTENTS.—Recent crinoids of coasts of Africa; by Austin Hobart Clark.—Mammals collected by W. L. Abbott on Borneo and some of small adjacent islands; by Marcus Ward Lyon, jr.—Notes on distribution of millipeds in southern Texas, with descriptions of new genera and species from Texas, Arizona, Mexico, and Costa Rica; by O. F. Cook.—Descriptions of new genus and species of isopod crustacean of family Idotheidæ from mouth of Rio de la Plata, Argentina; by Harriet Richardson.—Descriptions of 6 new genera and 31 new species of ichneumon flies; by H. L. Viereck.—Final supplement to catalogue of published writings of Charles Abiathar White, 1897–1908; by Timothy W. Stanton.—Notes upon 2 rare flatfishes, Gymnachirus fasciatus Gunther and G. nudus Kaup; by W. C. Kendall.—Descriptions of tineoid moths, Microlepidoptera, from South America; by August Busck.—Electric ray and its young from west coast of Florida; by Barton A. Bean and Alfred C. Weed.—New trematode, Styphlodora bascaniensis, with blind Laurer's canal [with list of references]; by Joseph Goldberger.—Bees in collection of museum, 2; by T. D. A. Cockerell.—Hoffman Philip Abyssinian ethnological collection; by Walter Hough.—New species of shells from Bermuda; by William Healey Dall and Paul Bartsch.—Revision of several genera of gymnospermous plants from Potomac group in Maryland and Virginia; by Edward W. Berry.—Scientific results of Philippine cruise of fisheries steamer Albatross, 1907–10, no. 9, descriptions of 3 new fishes of family Chætodontidæ from Philippine Islands; by Hugh M. Smith and Lewis Radcliffe.—Recent and fossil mollusks of genus Cerithiopsis from west coast of America; by Paul Bartsch.—Notes on genus Lepomis; by Barton A. Bean and Alfred G. Weed.—Remarks on long-tailed shrews of eastern United States, with description of new species; by N. Hollister.—Recent and fossil mollusks of genus Bittium from west coast of America; by Paul Bartsch.—Scientific results of Philippine cruise of fisheries steamer Albatross, 1907–10, no. 10, new genera of starfishes from Philippine Islands; by Walter K. Fisher.—Two amphibians, 1 of them new, from carboniferous of Illinois; by Roy L. Moodie.—New mollusks of genus Aclis from the north Atlantic; by Paul Bartsch.—Descriptions of new Hymenoptera, 2; by J. C. Crawford.—New tropical millipeds of order Merocheta, with example of kinetic evolution; by O. F. Cook.—Descriptions of 1 new genus and 8 new species of ichneumon-flies; by H. L. Viereck.—On supposed origin of moldavites and like sporadic glasses from various sources; by George P. Merrill.—Notes on insects of order Strepsiptera, with descriptions of new species [with bibliography]; by W. Dwight Pierce.—Relation of bornite and chalcocite in copper ores of Virgilina district of North Carolina and Virginia; by Francis Baker Laney.—Descriptions of new genera and species of fishes from Japan and Riu Kiu Islands; by John Otterbein Snyder.—Descriptions of new species of wasps with notes on described species; by S. A. Rohwer.—Preliminary notices of some new Pacific cephalopods; by S. Stillman Berry.—Fresh-water sponges in collection of museum: pt. 5, New genus proposed, with Heteromeyenia radiospiculata Mills as type; by Nelson Annandale.—Revision of forms of hairy woodpecker, Dryobates villosus, Linnaeus; by Harry C. Oberholser.—Description of new species of Æga from Atlantic Coast of United States; by Harriet Richardson.—Hothouse milliped as new genus; by O. F. Cook.—Descriptions of new genus and species of Janiridæ from the northwest Pacific; by Harriet Richardson.—New cestode from African bustard [with list of references]; by Brayton Howard Ransom.—Systematic position of crinoid genus Marsupites; by Austin Hobart Clark.—Index.

Recent and fossil mollusks of genus Alvania from west coast of America; by Paul Bartsch. Nov. 15, 1911. [1]+333–362 p. 4 pl. [From Proceedings, v. 41; no. 1863.] †

Two new species of parasitic nematodes [with list of references]; by Brayton Howard Ransom. Oct. 31, 1911. [1]+363–369 p. il. [From Proceedings, v. 41; no. 1864.] †

STATE DEPARTMENT

NORTHERN AND NORTHWESTERN LAKES SURVEY

NOTE.—Lake Survey charts may be obtained from U. S. Lake Survey Office Detroit, Mich., or from U. S. Engineer Office, Buffalo, N. Y. Payments must be made before charts are sent, and if made by mail must be by postal or express money order payable to the order of U. S. Lake Survey Office if ordered from Detroit, or to the order of U. S. Engineer Office if ordered from Buffalo. These charts may also be obtained, for cash only, at U. S. Canal Office at Sault Ste. Marie, Mich. They will be sent by express, the express charges to be paid by the purchaser on receipt of the charts, or free by mail at the purchaser's risk. Purchasers should indicate, when ordering the charts, whether they wish them sent by express or mail. The latter will be used when no choice is indicated.

The bulletins and supplements of the Lake Survey may be obtained free upon application at U. S. Lake Survey Office, Detroit, Mich., and at the engineer offices in Duluth, Milwaukee, Chicago, Grand Rapids, Cleveland, Buffalo, and Oswego.

Supplement 7, 1911, corrections and additions to Bulletin 20; to supplement information given upon charts of Great Lakes. U. S. Lake Survey Office, Detroit, Mich., [Nov. 20] 1911. p. 1–7+l. 8–15+[2] p. map, 4° †
